

Action DataConnect™

Key Benefits

Build and deploy custom integrations in an easy 3-step visual process

Integrate data from disparate applications and formats

Take advantage of unlimited scalability and infinite connectivity

Connect to data on-premise, in the cloud, or in a hybrid environment

Automate regulatory compliance

The Data You Need – When You Need It

Integrate all of your applications with any data source, inside your enterprise and in the cloud, with Action DataConnect. Whether you are managing data analytics for an entire company or a single project, DataConnect makes integration seamless, fast and easy.

Improve Business Insights

Count on fresher, more accurate data for better insights. Transform and cleanse data faster and easier to provide users with on-demand access to the data they need to analyze. Sharpen decision-making to gain competitive advantage.

Process More Data Faster

With Action DataConnect, you can capture and analyze disparate data faster than ever, communicating with virtually any client or data source and moving data in real-time or via batch processing.

Improve Productivity

Data integration used to be a real time-sink, but not anymore. Action DataConnect simplifies and automates tedious manual tasks and data preparation jobs so your IT can focus on mission-critical projects, your end users can be more self-reliant, and your analytics workflow can be more efficient.

Automate Regulatory Compliance

Keep pace with ever-changing regulations and maintain compliance without sacrificing your ability to fully leverage big data. Action DataConnect automates regulatory updates so you can maintain compliance in your analytics environment while providing your users with access to the most current and complete data. Leverage industry templates and transform functions to mask data and ensure compliance before it reaches its destination.

Connect to Data at all Levels

Invisible Connection

Give your business users on-demand access to data while making data integration invisible. With Action DataConnect, simply log in and you can seamlessly blend data from multiple sources whether on-premises, in the cloud, or both.

- Get the data you need from applications you use with one-click integration
- Skip the IT backlog and integrate without unnecessary delay or cost
- Perform integration without setup hassles

Basic Connection

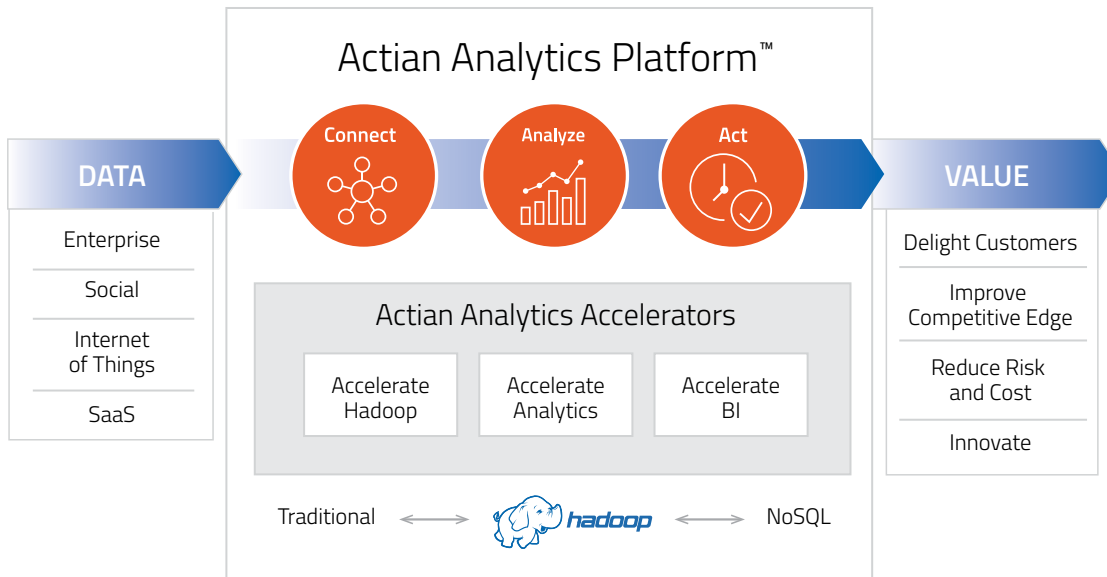

Pre-packaged apps, maps and data services let business users integrate data through a simple three-step process that masks data integration complexities. They can drag fields, without coding or scripting, and pull in data, without extra help or services.

- Perform custom integrations in minutes
- Tailor scheduling capabilities
- Map using the simple data-mapping wizard

Advanced Connection

Action DataConnect also delivers sophisticated, highly scalable data integration, profiling and matching capabilities that excel in the most demanding big data environments. With Action DataConnect you can integrate, migrate, sync, validate, standardize or enrich your data while maintaining data quality in every facet of your business.

- Streamline data integration using a convenient browser-based UI and visual design process and drag & drop link-style mapper – with no need to maintain custom-coding
- Monitor integration server and execution status with message-driven integrations
- Deploy anywhere – with on-premise, cloud or hybrid options
- Scale to any volume of data and connect to any endpoint
- Take advantage of end-to-end lifecycle management
