Actian and Qlik®

Real-time analytics

Unrivaled ad-hoc data analytics at scale without compromise

Real-time direct query access of EDW and updated operational data with zero performance penalty

Qlik Data Concierge makes creating apps in Qlik Sense easy

Qlik provides visualization for data managed by Actian Vector, Actian X and Actian Zen

Standard SQL 2003 support and full ACID compliance with Enterprise grade security and resilience

Hybrid data access on-premise, on AWS and Azure

Actian DataConnect and DataFlow provide high speed data integration, data transformation and loading for data sources

Game changing insight at volume and scale

Actian enables Qlik® to visualize operational data warehouse data, faster. Actian, the hybrid data analytics, integration, and management company, delivers data as a competitive advantage to thousands of customers worldwide. Through the deployment of innovative hybrid data technologies and solutions Actian ensures that business critical systems can transact and integrate at their very best – on premises, in the cloud or both.

"Enterprises are looking to maximize the value of their data, and speed to analysis is essential to unlocking that value and driving more timely and meaningful insights from all their data."
- Drew Clarke, SVP – Office of Strategy Management at Qlik.

- **Actian Vector.** Actian Vector is a relational database engine designed for high performance analytics. Actian Vector was designed from the ground up to exploit performance features in today's commodity x64 CPUs such as vectorization and larger chip caches enabling in-chip analytics. Actian Vector's record breaking speed delivers results faster than any of its competitors. Actian Vector stands apart from conventional analytics databases due to its patented zero performance penalty updates. Vector enables real-time analytics on-premises, on AWS and Azure.

- **Actian DataConnect** is a hybrid integration solution that enables you to quickly and easily design, deploy, and manage integrations on hybrid, on-premises and cloud environments with no limits on data types or volumes. With its emphasis on reuse and adaptability, DataConnect is engineered to help you cost-effectively integrate diverse data and applications from numerous endpoints.

- **Actian X** is a combination of industry-leading Ingres transactional and Vector analytic databases, world class integration and a robust monitoring tool. Actian X runs business critical systems for Fortune 100 companies and government agencies and has industry leading customer satisfaction ratings.

- **Actian Zen** is the most reliable, small-footprint, low-maintenance database management system (DBMS) in the world. Actian Zen combines NoSQL programmatic API-based access and SQL relational access for the perfect blend of performance and standard access. Actian Zen's zero DBA design is ideal for embedded and IoT edge applications.
