

Actian Avalanche Connect

Enjoy pre-built connectivity from hundreds of data sources to the Actian Avalanche cloud data warehouse

Key Benefits

Quickly move data to Avalanche using pre-built connectors to hundreds of data sources, including SaaS apps, databases and analytical tools

Connect multiple data sources and applications to Avalanche without any coding

Deploy, orchestrate and manage your Avalanche integrations anywhere: in the cloud, on-premise, hybrid environments

Reduce administration costs and implementation time from weeks to minutes

Ensure end-to-end security, compliance and governance

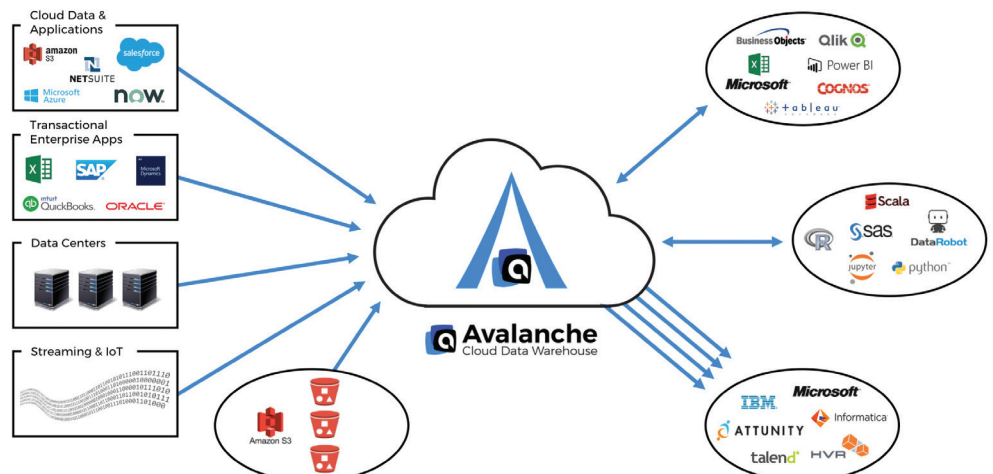

Today's insight-driven enterprises are looking to cloud data warehouses to meet the demands of the new digital age. However, the move to the cloud amplifies the data integration challenge, as it becomes more difficult to continuously ingest and update data that is sprawled across on-premise and cloud systems in many data silos.

Actian Avalanche is a fully-managed cloud data warehouse service that comes with pre-integrated connectors to hundreds of popular data sources. Avalanche removes the extra costs and hassle that accompany other cloud data warehouse platforms that require you to work with partners to source and move data to their respective platforms.

Avalanche can seamlessly run on-premise or in a hybrid fashion across any combination of cloud and/or on-premise environments. It improves upon the performance and scale offered by legacy data warehouses while providing modern advantages of cloud elasticity, simplicity and the latest advancements in analytics.

Move data from all your applications to Avalanche with just a few simple clicks

The Actian Avalanche Connect feature is a key component of Actian Avalanche that facilitates your move to its platform. It provides over 200 pre-built enterprise connectors to popular data sources such as ServiceNow, Salesforce, Workday and NetSuite. The integrated Actian FlexPath architecture enables you to source data from data sources with just a few clicks in the UI and, more importantly, the integration is fully managed by Avalanche.

Avalanche Connect provides the following key capabilities to connect various data sources and applications to the Avalanche Cloud Datawarehouse:

- **Integrate anything without any coding** – Connect to virtually any data source, format, location, protocol or any cloud sources using over 200 pre-built connectors to applications and technologies such as Salesforce, NetSuite, ServiceNow, Workday, databases, text files and with standards such as REST, OData, JSON, and XML.
- **Integrate anytime** – Schedule, orchestrate and manage your integration from a browser on your own time, anytime. Avalanche Connect supports real-time events as well as batch integration patterns and every integration deployed and configured is automatically assigned a URL end-point. This enables other web apps to be a client of the integration and dynamically manage any aspect from authorization, deployment, configuration, and execution using the RESTful API.
- **Integrate anywhere** – You can connect your information assets no matter where you host them, with the flexibility to deploy integration apps on-premises, within containers, private or public clouds, serverless environments, and edge devices.
- **Quickly integrate with source systems** – Accelerate integrations with source systems – the data feeds that enable you to pull (or push) data into the Actian cloud data warehouse. Consolidate structured or unstructured data from anywhere – data marts, apps, or databases.
- **Empower a broad set of users** – Citizen integrators, business analysts and highly-skilled integration specialists can all easily integrate applications and extract data using pre-built connectors
- **Centralize management** – Browser-based user interface enables operations and support staff to easily configure, schedule, execute, and monitor all deployed integrations from a single pane of glass. You can gain a holistic view of all your templates, configurations, macros, schedules, job history, and more across large, distributed environments.
- **Realize rapid time-to-value** – Intuitive, visual design and management interface makes it easy for users to design, deploy, manage and repair integrations with a short learning curve

Optional QuickStart services to jumpstart your integration

You can take advantage of the following packages from Actian Professional Services to ensure maximum success with your Avalanche integration:

- **Avalanche SaaS Connector QuickStart:** This 5-day engagement offers a pre-defined set of professional services to help you access data from your preferred SaaS apps and load it into Avalanche quickly and efficiently
- **Avalanche Database or File-based Connector QuickStart:** This 3-day engagement offers a pre-defined set of professional services to help you access data from your preferred databases such as MySQL, SQL-Server and Oracle, or from your preferred file-based data such as CSV, Excel, XML and JSON, and load it into Avalanche quickly and efficiently

With experience in hundreds of integration engagements, Actian Professional Services can add significant value to the success of your Avalanche integration. Each QuickStart services includes:

- Pre-built, customizable integration templates to access and sync your preferred data with Avalanche
- Training on data integration techniques
- Review of best practices and planning

Extend to full enterprise-wide connectivity

Action Avalanche Connect is powered by Actian DataConnect — a proven iPaaS (integration platform as a service) solution for integrating disparate data sources as well as enterprise and cloud applications quickly and easily. DataConnect gives you the tools to define connectivity, migrations, data consistency, or transactional data integration with multiple systems using an intuitive and uniform graphical interface. It includes hundreds of pre-built connectors and guided workflows so you realize value faster by accelerating not just the initial design, but the ongoing maintenance of your connectivity.

For a limited time, Avalanche customers who desire enterprise-wide connectivity to address broader needs can upgrade to a full enterprise license of Actian DataConnect at a special rate. Start taking advantage of endpoints beyond the Avalanche cloud data warehouse and more runtime engines to power your integration. For more information, contact info@actian.com today.
