

Action

Action transforms business by simplifying how people connect, manage, and analyze data. With a portfolio of data infrastructure products built on decades of expertise and innovation, Action helps companies solve the world's most mission critical data problems.

Action Software Products to Connect, Manage & Analyze Data

Avalanche Cloud Data Platform: The flagship Avalanche Cloud Data Platform is a fully managed suite of data services with flexible deployment options including public cloud, hybrid, or on-premises environments. The Avalanche platform delivers enterprise-proven data integration, data management and data analytics services in a trusted, scalable, and easy-to-use platform. The Avalanche platform stands out from the competition by providing unrivaled price-performance, real-time operational insights, and access to hundreds of data sources in an integrated platform.

In addition to the Avalanche platform, Action offers a broad range of trusted data products:

Ingres	Legendary transactional RDBMS	OneDB	Embeddable with SQL, time series, spatial and multimodal capabilities
Action X	Hybrid transactional/analytical processing	Vector	Vectorized for high-performance BI and analytics with operational insights
NoSQL	Extremely complex object models requiring highly scalable and available processing	DataConnect	Low-code integration platform to automate data pipelines and ensure data quality
Zen	Embeddable edge data management solutions	Link	Embeddable, cloud native, no-code integration platform to provide out-of-the-box integration for 3 rd party applications and resources

WHY ACTION?

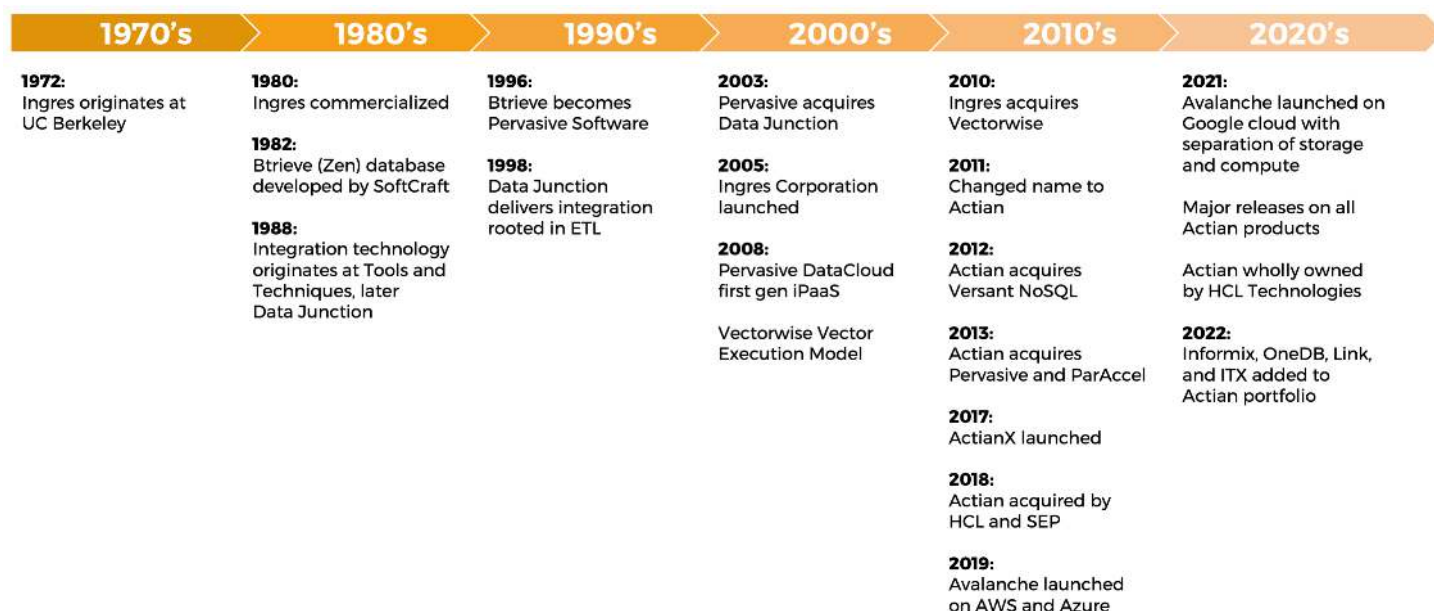

Unmatched Performance: Built to deliver sub-second query results at a fraction of the cost of the competition.

Action Makes Data Easy: The Avalanche platform combines data integration, management, and analytics in an easy to use, scalable platform to meet the most demanding enterprise data needs.

Trusted: Over 10,000 customers across industries and geographies rely on Action products to drive innovation and power their most sensitive data deployments.

Flexibility: Deploy products anywhere with the flexibility to move data workloads between data centers, cloud, or hybrid environments.

Data expertise: Action has a broad portfolio of groundbreaking patents, a history of industry firsts, and decades of experience building mission-critical solutions that customers trust to power their business.

CUSTOMER PROOF POINTS

PredictX, a leading provider of predictive expense analytics, helps Fortune 100 companies optimize travel-related expenses through AI and advanced analytics built through the Avalanche Cloud Data Platform.

Sheetz, an American chain of convenience stores and coffee shops, processes 3 billion rows of data on the Avalanche Cloud Data Platform, delivering real-time access into customers analytics.

HSS Hire, one of the UK's leading suppliers of tool and equipment hire and services, uses Action X to ensure their supply chain runs and inventory is managed across 265 supercenters and branches.
