# Actian X
## Vectorized Native Hybrid Database

Actian X is a combination of industry-leading Ingres transactional and Vector analytics database, world-class integration and robust monitoring tool. Actian X runs business-critical systems for Fortune 100 companies and government agencies with industry-leading customer satisfaction ratings.

*"The reasons why we originally chose Ingres and continue to rely on the database is due to the great functionality, high levels of reliability and stability, a cost-effective licensing model. It's backed up with excellent support. When we compare Ingres to other database technologies on the market, the Ingres database continues to be one of the best choices to power our flight planning."*

**RUDI KOFFER, SENIOR DATABASE SOFTWARE ARCHITECT, LUFTHANSA AIRLINES**

## BENEFITS & VALUE

**Operational Analytics:** Actian X combines a record-breaking analytic engine with rock-solid OLTP to enable enterprise applications with both OLTP and analytic features.

**Integration Included:** Connect Actian X and Ingres applications to the rest of the enterprise with an end-to-end solution for designing deploying and managing integration.

**Enterprise Ready:** Low TCO, ultra-stable enterprise RDBMS with 24X7 global support.

## CAPABILITIES

- **Incremental Analytics made easy:** Adding recording-breaking analytics to Ingres applications is simple-create a table and copy the data you need. Sales access methods, same queries – just tremendously faster results.

- **Monitor Database System Health**: Use pre-configured plug-ins to keep track of the health of Actian X and Ingres databases and host systems. Keep business-critical applications in top shape and get better planning for scheduled.

- **Easy Test and tune using OLTP features:** allow per-query parallelism for developers to test and tune application performance while storing the data in a columnar format for faster access.
