

# An Easy and Safe Modernization Journey for Ingres and OpenROAD Applications

*You decide what to modernize—and when—to support your unique journey.*

## Ingres in the Cloud

- Latest hardware with 5 9's resiliency at the infrastructure layer
- Latest patch and release of Ingres
- Actian-managed backup, deployment, security, and monitoring
- Low/no risk migration - 100% compatible with on-premises deployment
- Ability to leverage other cloud services

## Modernized Ingres ABF for Formed-Based Applications

- Automated conversion significantly reduces the risk, cost and effort of modernizing apps versus completely rewriting applications
- Reuse of existing business logic avoids rewriting decades of business logic from scratch
- Incremental application migration where modernized apps can run side by side with unconverted apps

## Ingres On-Premises

- Legacy (UNIX and VMS) and modern platform (Linux and Windows) support
- Virtualized or bare metal

## OpenROAD for Web and Mobile apps

- Easy to extend applications for web and mobile deployment, using HTML5 and JavaScript

Whatever path you choose, Actian supports you every step of the way.

- ✓ Reduce risks with the Ingres NeXt Readiness Assessment
- ✓ Save Time with Migration Toolkits
- ✓ Get Personalized attention with the Ingres NeXt Early Access Program
- ✓ Accelerate adoption with the Actian Operational Services Team
