

Why Actian for Higher Education

Schools and Universities Achieve Success by Making Smart Database Decisions

Colleges and schools are optimizing Actian databases for a vast range of use cases.

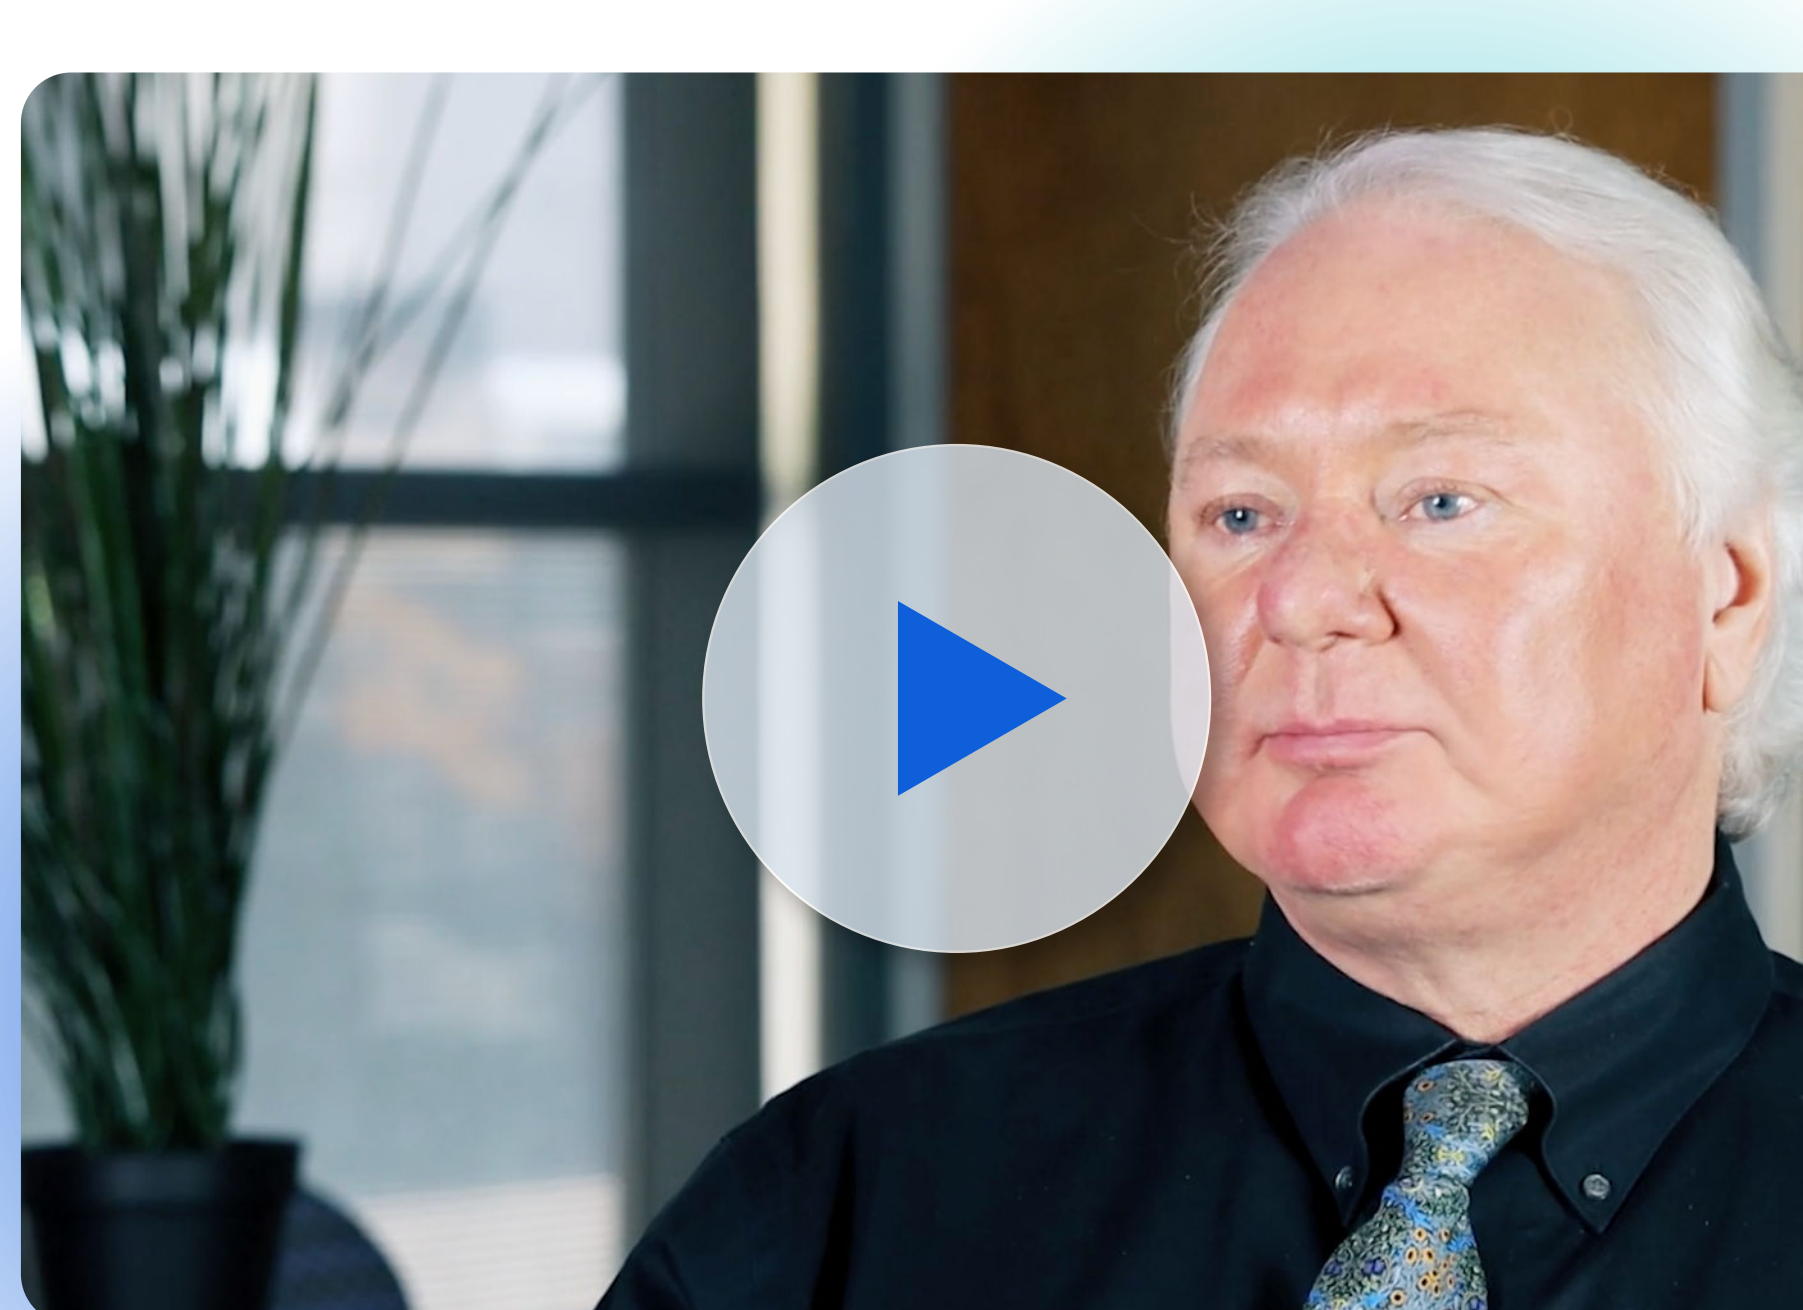

Improving efficiencies for renowned universities

100s of memberships managed

Even tiny nano items require big data. That's why Marvell Nanofabrication Laboratory at UC Berkeley uses Actian Ingres database to efficiently monitor the lab, manage hundreds of memberships, forecast financials, and more.

[Watch the Marvell NanoLab story >](#)

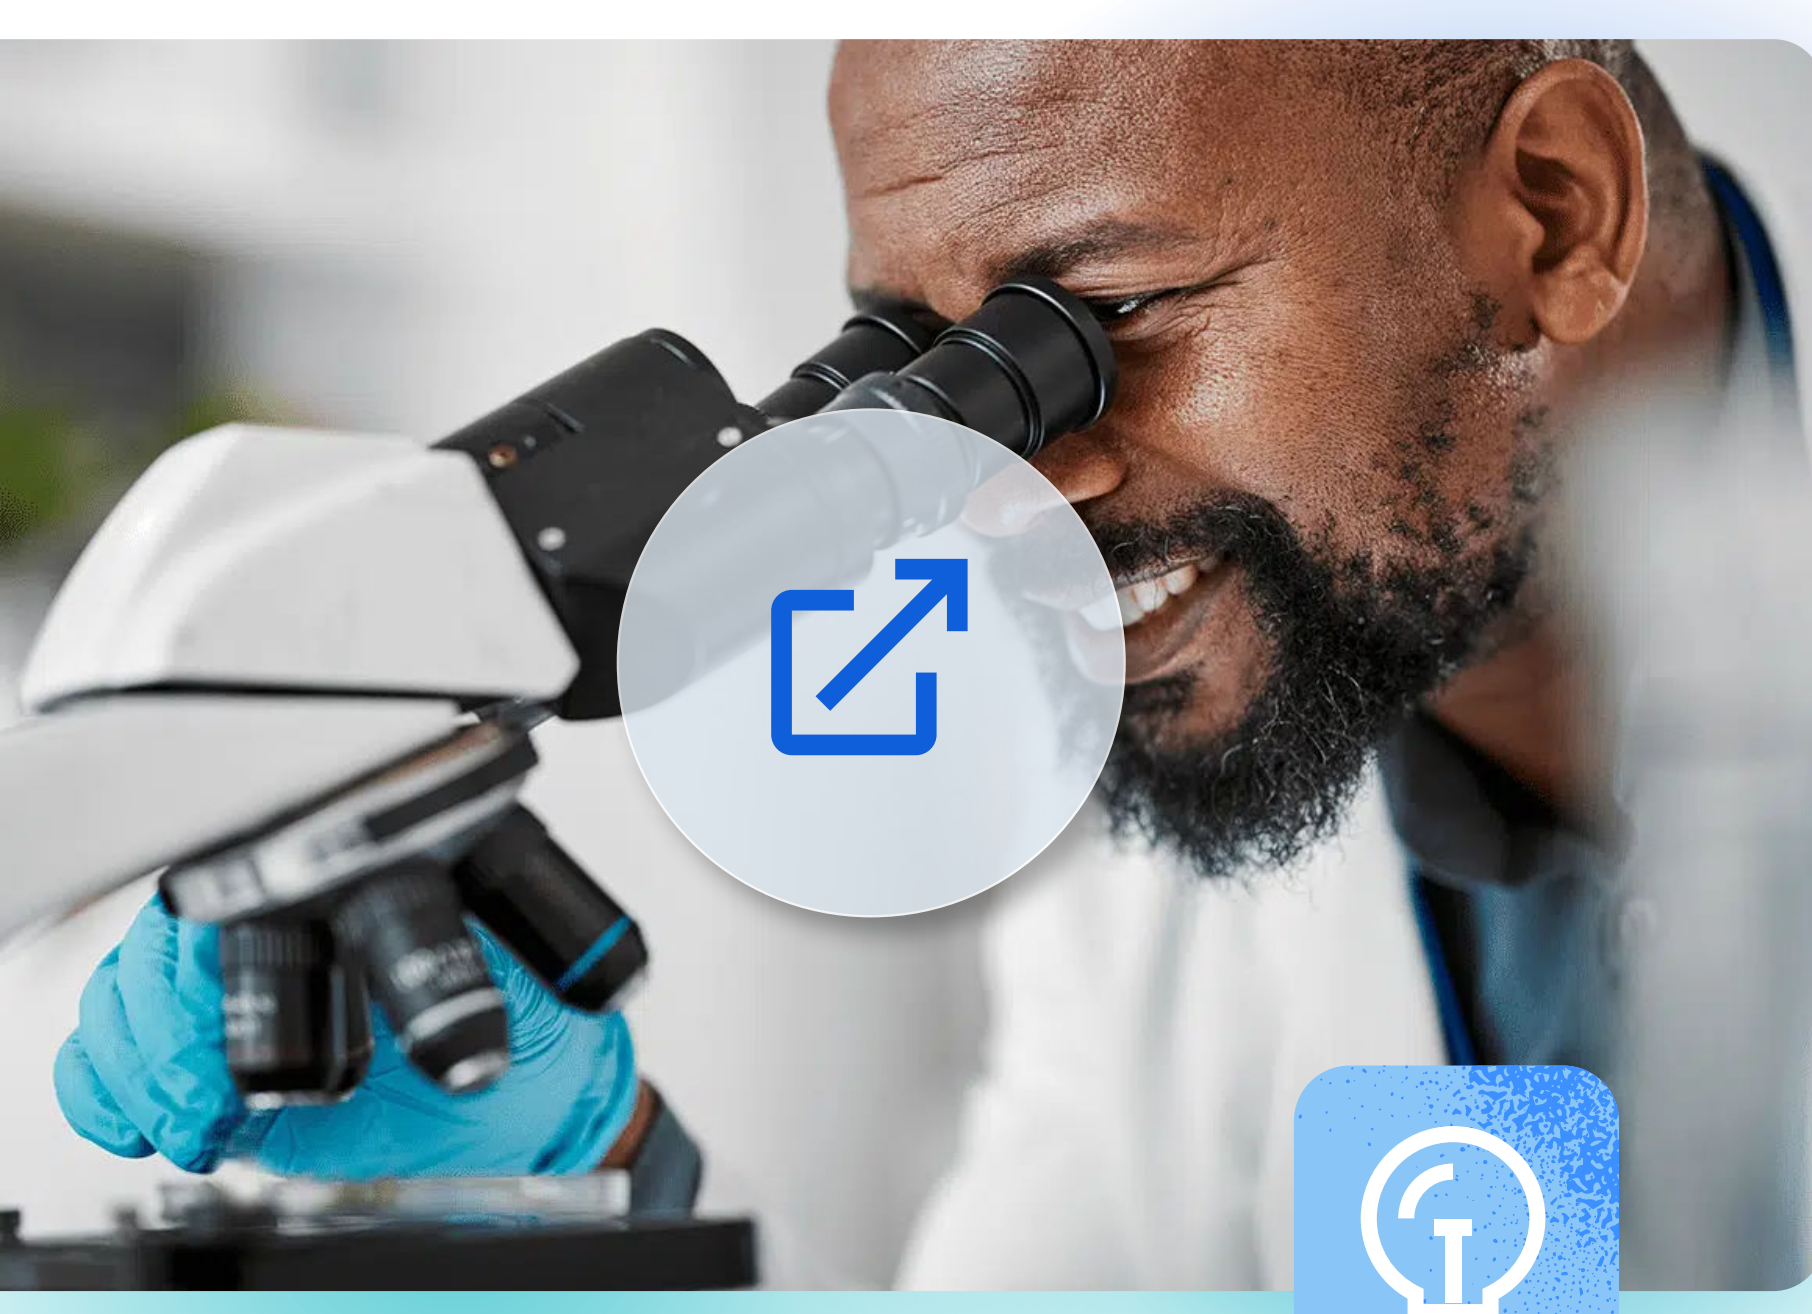

“Actian is the database product that the lab has used, whether it's tracking who's in the lab, whether it's tracking who has access to the lab...all of that is collecting and analyzing data, and to do that, you need a reliable and stable database.”

– Bill Flounders, Ph.D., Executive Director

From days to seconds

The Clinical Trial Service Unit and Epidemiological Studies Unit at the University of Oxford deployed Actian Ingres enterprise-grade hybrid database. The time for ad-hoc queries against large data volumes dropped from days to minutes or seconds.

[Read the University of Oxford's story >](#)

“We've gone from being used to seeing queries hang or take an age to run, to complete disbelief in seeing just how fast [Actian Ingres] handles them and returns results. Simply jaw-dropping.”

– Geraint Jones, Database Administrator

Supporting Essential Data-Driven Apps and Processes

Major migration, no disruption

The University of Western England used Actian Professional Services to upgrade to Actian Ingres and migrate student records to Linux. The result is increased application performance and lower operating costs.

[Read the UWE story >](#)

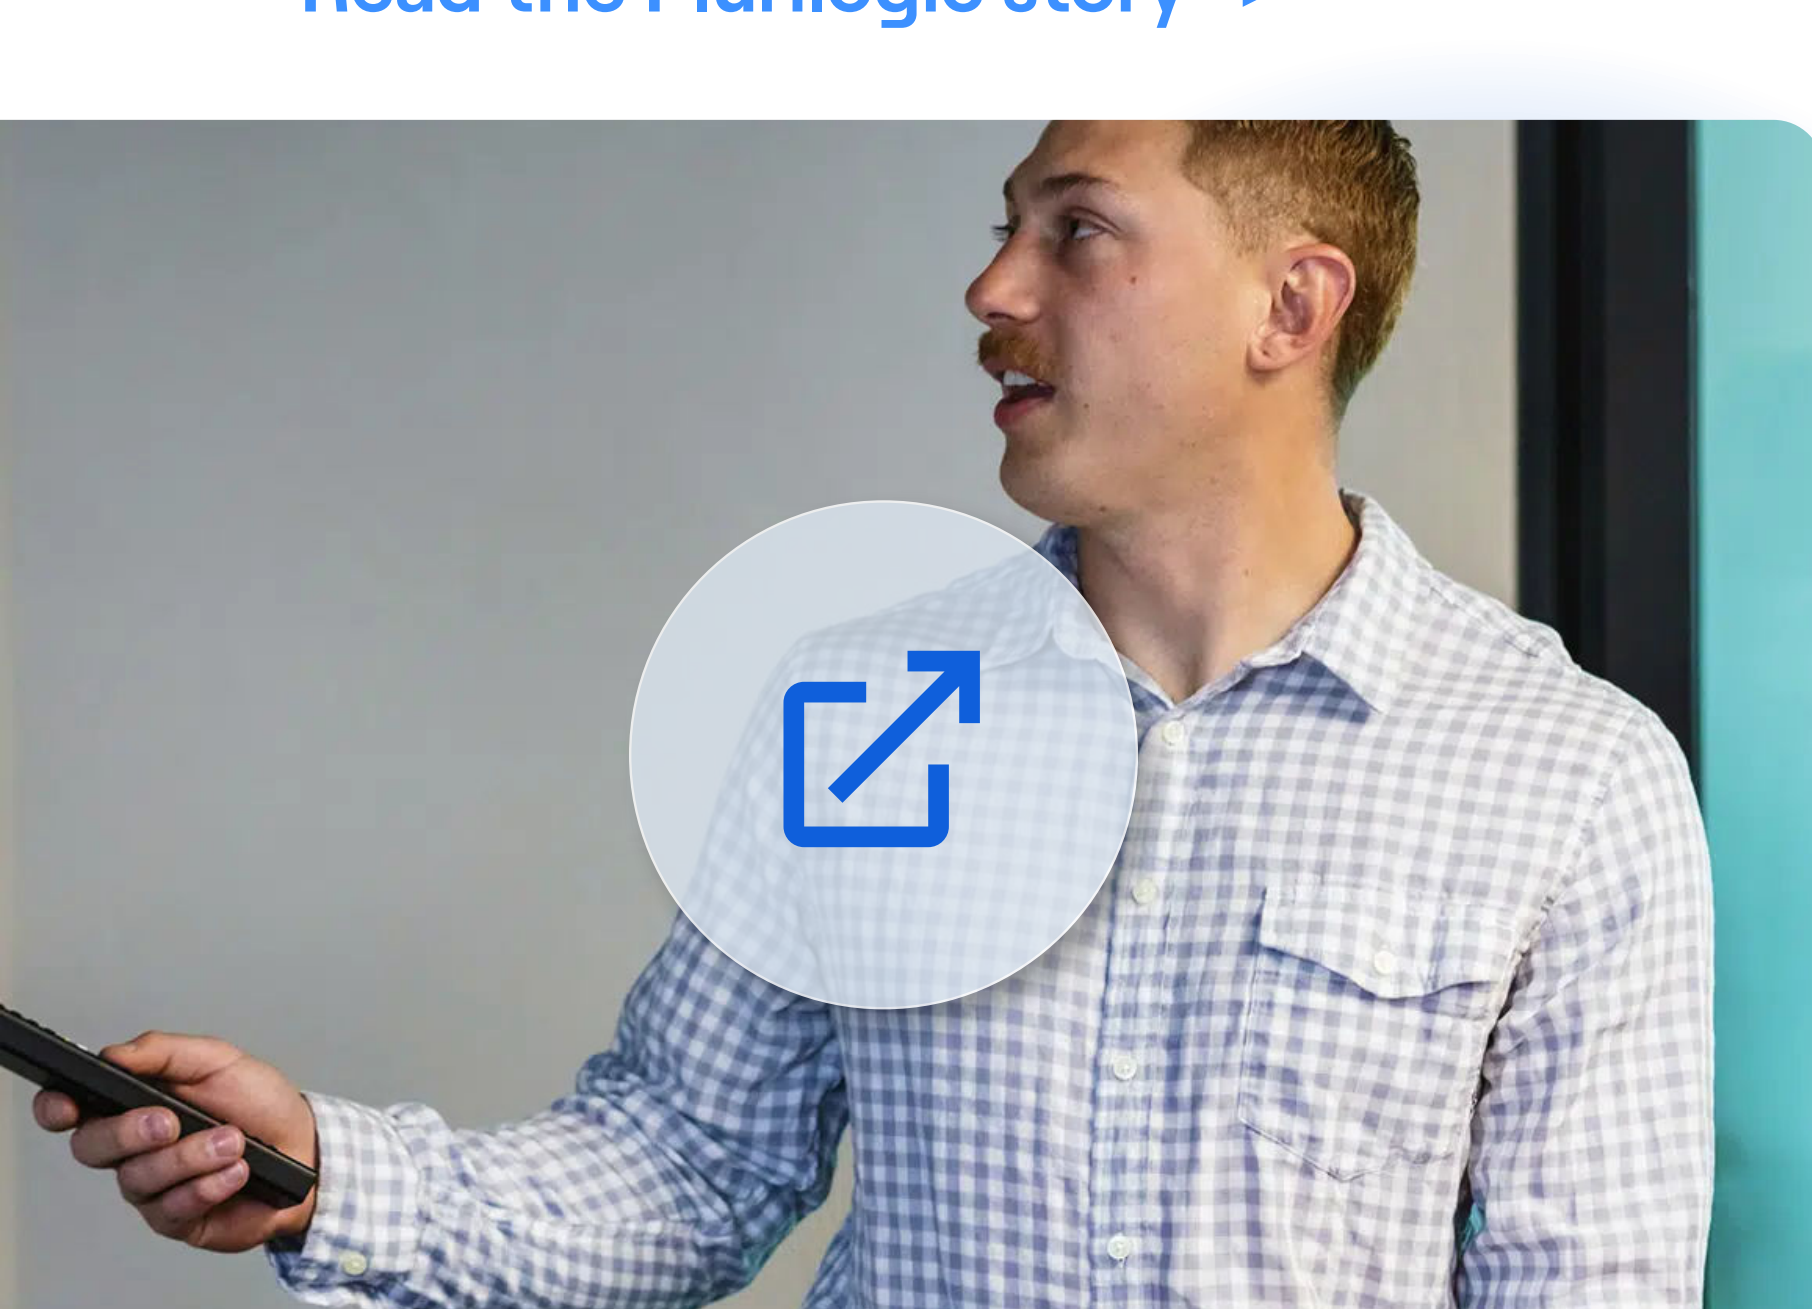

“The Actian personnel were very proactive about problem-solving and suggesting solutions. They clearly knew what they were doing and were very responsive to queries from our team.”

– Rob Andrews, Project Manager

Improving student safety

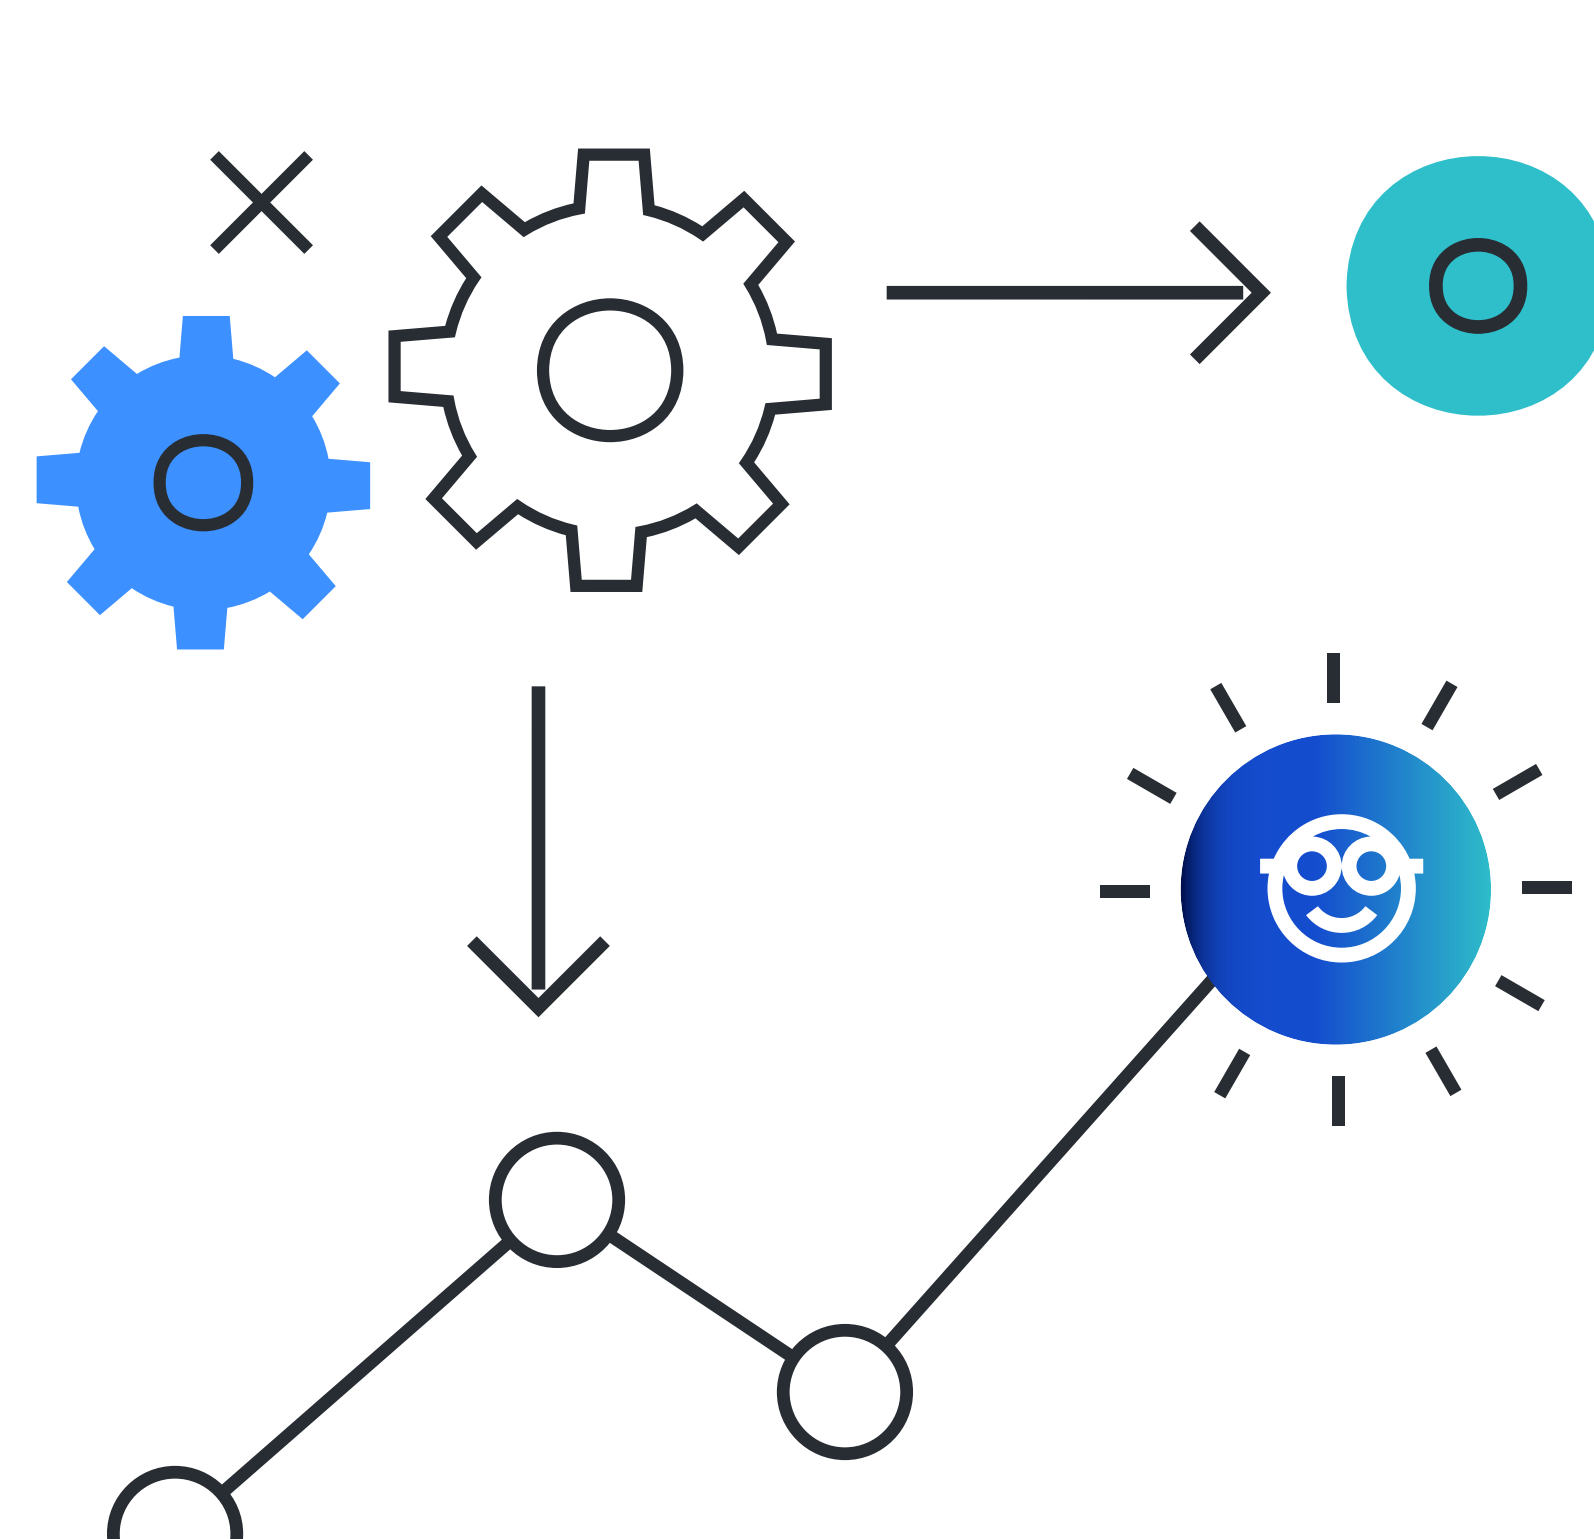

Plurilogic provides school information systems. The Actian Zen database helps Plurilogic capture data to monitor student attendance and portable educational assets to improve student security, reduce school asset losses, and more.

[Read the Plurilogic story >](#)

“With Actian Zen...we've been able to extend our integrated solutions in classrooms and across campuses to better track and manage both students and institutional assets.”

– André Beauchamp, CEO
