

Action Data Intelligence + Observability

Every source. Every insight. Every decision. Powered by trusted data.

Action Data Intelligence & Observability combines data cataloging, near real-time observability, and autonomous data quality management to accelerate time-to-trust and fuel data-driven innovation. From discovery to decision, Actian ensures your data is findable, reliable, and ready for AI.

Faster Discovery & Smarter Governance

Agentic AI Intelligence that connects every insight to business impact.

- AI-powered discovery with natural language search and smart recommendations
- Automated PII detection and policy application across all data assets
- Smart classification using ML to auto-tag and categorize data assets
- Autonomous anomaly detection with LLM-powered root cause analysis
- MCP Server connecting AI agents in Claude, ChatGPT etc., directly to trusted data

Always-On Trust and Near Real-Time Reliability

Ensure every data pipeline is healthy, observable, and actionable.

- Continuous monitoring across all data pipelines and warehouses
- Near real-time data health validation before consumption
- Intelligent incident routing to data owners via Slack/Teams/JIRA
- Automated resolution suggestions with one-click remediation
- End-to-end lineage tracking for impact analysis and faster resolution

Scalable, Secure and Enterprise-Ready

Designed to meet the demands of complex data ecosystems.

- Knowledge graph-driven catalog with federated metamodel management
- Policy-driven automation with rule-based governance enforcement
- Multi-cloud observability across Snowflake, Databricks, BigQuery
- High-performance processing with 99.9% uptime reliability
- Enterprise security with advanced RBAC and encryption

Unified Experience

Empowering every data stakeholder, from all levels.

- Business context enrichment with lineage, ownership, and usage insights
- Single platform for all data stakeholders and use cases
- Persona-friendly interfaces from analysts to executives
- Self-service data access with built-in governance guardrails
- Data contracts & products for streamlined data operations

Integration Excellence

Integrate your entire data stack with speed and simplicity.

- Hundreds of pre-built connectors for seamless data ecosystem integration
- API-first architecture for custom integrations and automation
- Native cloud platform support for Snowflake, Databricks, BigQuery
- Workflow orchestration with Airflow, Prefect, and more
- BI tool integration with Tableau, PowerBI, Looker, and others

Proven Performance

Proven outcomes for the world's most trusted enterprises.

- Industry-leading reliability with 99.9% platform uptime
- Customer success with highly regulated industries worldwide
- Rapid deployment with day 1 value and quick wins
- Award-winning platform recognized by industry analysts
- 24/7 expert support with dedicated customer success teams

Data Confidence → Near Real-time Insights → Unified Platform
