

Turn your data catalog into AI intelligence

The data intelligence platform for discovery, governance, and agentic AI

The Actian Data Intelligence Platform helps organizations discover, trust, and activate their data for governance and AI-driven insights. Our integrated platform combines data cataloging, governance, observability, and agentic AI capabilities to eliminate the impossible choice between speed and governance. Deploy AI agents with built-in trust from day 1, not months.

The Actian Difference

Powerful capabilities for agentic AI, regulatory compliance, and self-service analytics

Discover, understand, & access all your data instantly

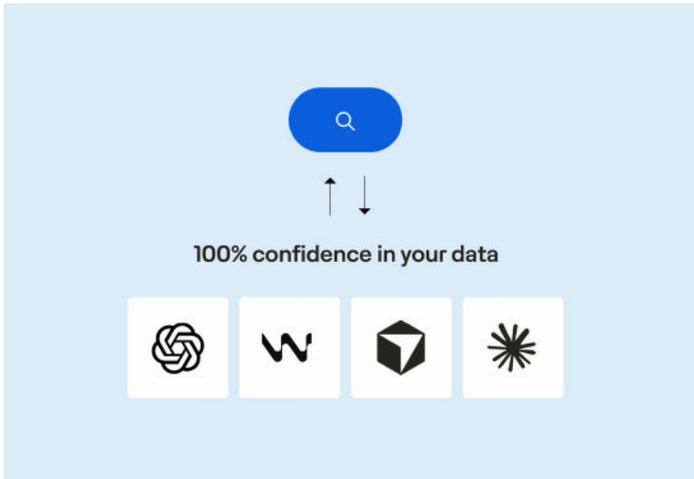

- **Unified Data Catalog and Data Marketplace** for centralized discovery and ready-to-use data products and contracts.
- **Federated Knowledge Graph** with domain-specific ontologies to maintain local autonomy while connecting to the enterprise semantic layer.
- **Business Glossary** with hierarchical management Chrome Plugin provides comprehensive context and business definitions directly in BI dashboards.

- **AI-Powered Search** using natural language to find data assets, understand context, and get instant business definitions.
- **Data Access Request Management** with automated workflows and webhooks to reduce manual overhead.

Attributes					
Name	Completeness (%)		Correctness (%)		Duplicates
Associated_Drug	72%		99%		143737
Change_Type	99%		97%		199644
Charity_Indicator	40%		93%		80586
Country_Of_Travel	2%		96%		5519

Build trust, mitigate risk, and ensure regulatory compliance

- **Complete Data Lineage** with end-to-end tracking of data transformations and impact analysis.
- **Contract-First Data Products** with embedded security policies and automated violation detection for data reliability.
- **Real-Time Data Quality Monitoring** from ingestion to consumption with automated issue detection and resolution.
- **Built-in Compliance** with automated classification and audit trails for GDPR, CCPA, and BCBS 239 regulations.
- **Watchlists and Alerts** provide visibility without blocking contributors, embedding security policies directly in data contracts.

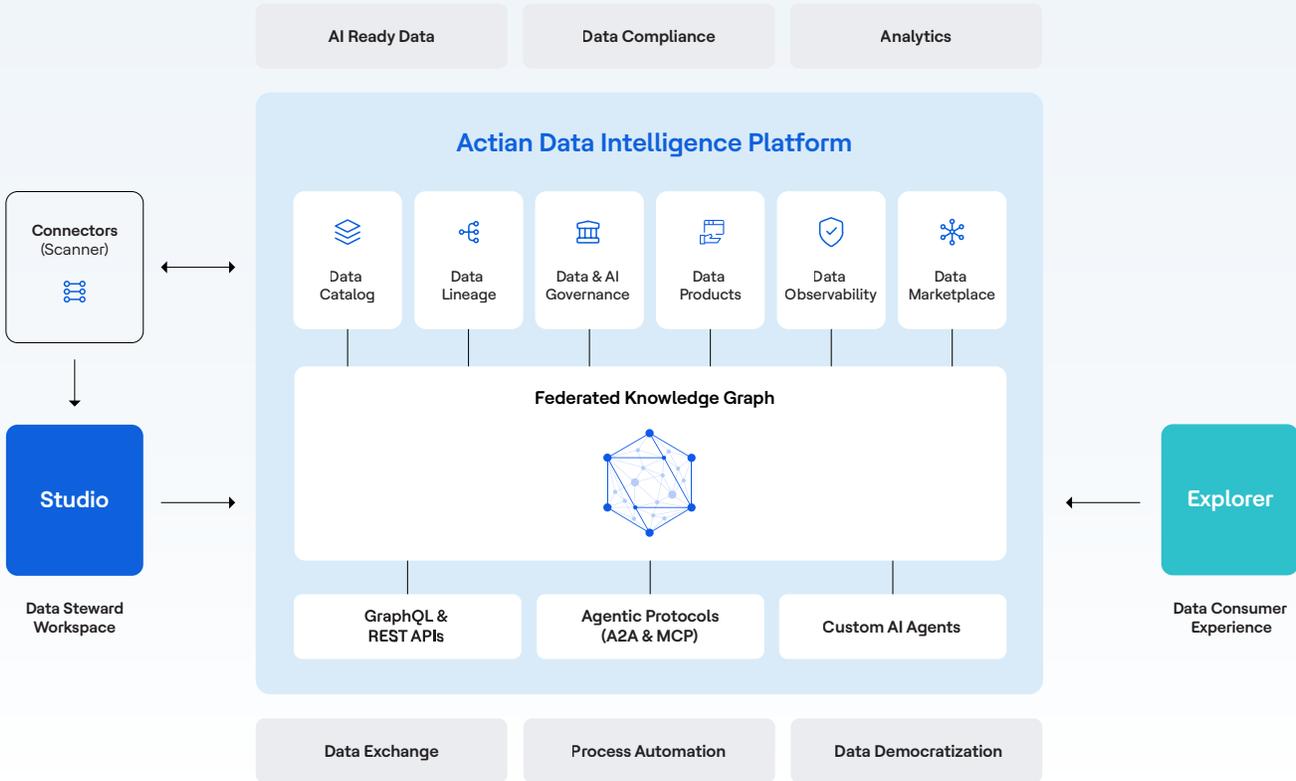

Activate trusted data with agents and automations

- **Custom AI Agents** bridge your data catalog and AI assistants for contextual answers with definitions, ownership, and lineage.
- **MCP Server Integration** delivers real-time validated metadata directly to AI tools and agentic workflows.
- **AI Data Analyst** understands business questions and generates SQL with built-in governance controls.
- **Automated PII Detection** with AI-driven classification and tagging of sensitive data across all sources.
- **Real-Time Validation** ensures AI agents access only trusted, quality-validated data before making decisions

Deliver measurable business outcomes through trusted, governed data access for both humans and AI agents.

One Unified Platform. Infinite Agentic Possibilities.

From data discovery to AI activation, empower every user with intelligent, governed access to your enterprise knowledge graph.

Trusted by enterprises worldwide

Organizations across banking, healthcare, manufacturing, and retail trust Actian to power their data and AI initiatives.
